

PHILIPS

CoreLine

LED range

“My space, **my solution.**”

VEGATECH.nl B.V. is a technical-services company in the Netherlands that designs and implements tailor-made installations. When Heeren Fruit & Vegetables asked to take on the lighting infrastructure for its new premises, VEGATECH.nl B.V. was faced with a challenge, they knew exactly how to handle.

Marijn Verbruggen, owner of VEGATECH.nl B.V.: “An industrial company like Heeren Fruit & Vegetables has very specific demands for its lighting equipment. The production takes place in cold spaces and high cleanliness standards are the norm. Looking into Philips LED lighting, the CoreLine Waterproof performs

excellently in cold environments. It’s robust design can withstand the challenging conditions and reduces the risk of contamination to operations.

Also, hygiene is extremely important, which is solved with the IP65 (dust and moisture) and IK08 (impact) rating. Marijn Verbruggen: “The long lifetime of LED reduces the maintenance, which means less disruption to the operations. The energy savings of up to 50% are great for the business of my customer.”

“**Excellent performance** in challenging conditions.”
